

HIGH QUALITY INJECTION MOLDING TOOLS FROM CHINA AND TAIWAN

GM&T is an expert designer and manufacturer of tools in China and other countries around the world. Over the years we have build a large base of technically capable selected toolmakers. The tool making performance is evaluated continuously. This policy enables us to always do a competitive offer.

Located in the Netherlands, our plastic engineers design the mold for you. Their thorough understanding of the injection molding process, gives you a reliable well designed mold that will live up to your expectations. Production trials are held in China and in Europe. Some projects are built under our direct supervision and in compliance with automotive standards.

MOLD CONSTRUCTION

Errors in communication are the nr 1 reason for failures in mold construction. Therefore our customers benefit from an accurate project planning system. All stages are controlled by working with the required project information.

- Purchase order
- 2D preliminary mold design
- Approval of mold design
- Shipment of plastic material and mold parts
- 3D design of mold
- Mold building
- Status report by photo's
- T1 sampling
- Customer remarks
- T2 sampling
- Customer approval of parts
- Shipment of mold to Wicro
- T3 trialrun at Wicro
- Approval of process by customer
- Shipment of mold to customer
- After Sales

GM&T people are the only partner you need in order to efficiently get access to the benefits of a world market of toolmakers. We bridge gaps in culture, communication, technology standards, and technologies in order to supply you with the best injection mold at the lowest investment. A typical mold is build in 6 to 8 weeks soon after which we present the first plastic products to you. Usually, there is still some room at this stage to implement the latest requirements of your evolving product-design project.

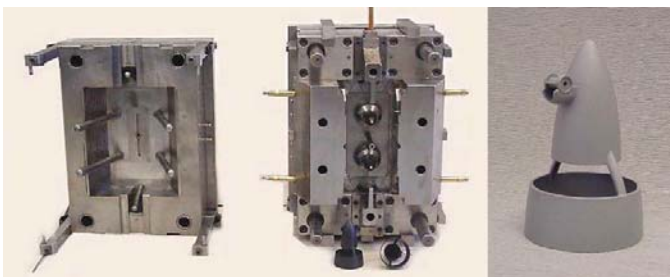

SERVICES

Transformation of design into production engineering / Analyses of manufacturability and fit-for-use of your drawings / Injection mold design for optimal cycle times / Choosing the right plastic material / Global sources supervised mold construction / Production in China and Europe of series of plastic products.

BENEFITS

- Molds tested for production
- Savings on investments of 30%-50%
- Molds specially designed for production use
- Progress reports with foto's
- Turn key, (incl. machine and automation)
- Expertise in injection molding
- Expertise in plastic materials
- First products on time
- Molds build according to your specifications
- Steel certificates and shot guarantees
- Compliance with automotive standards
- Large capacity (up to 50 molds per project)
- Injection molding series production in China and Europe

GO GLOBAL

Evermore European and American customers are turning the threat of globalisation into a competitive advantage. They rely on the global sourcing by GM&T. We prove that you do not have to be a multinational company yourself in order to reap the benefits of globalisation. Become a world-wide operating company yourself by linking up to our manufacturing chains that cover the whole globe! We will make your molds in the best location that fits your needs. So you can improve your business success by focussing on your marketing and sales.

Sell your products months earlier. Have your new products on time for that trade fair. Save on investments without compromising quality. Do you want to learn how we can do this for you? Do not hesitate to contact us and ask about recent success stories.
